| 09/2019 - 03/2020 | <b>General Motors</b> Full Stack Developer <span style="float: right;">Herzliya, Israel</span> <ul style="list-style-type: none"><li>• Worked in a team of full stack developers, alongside QA and DevOps, on OnStar Vehicle Insights — a fleet management system</li><li>• Integrated a Jest and fast-check based testing suite</li><li>• Key duties included developing new features (in TypeScript both on front end and back end, CSS and PostgreSQL) and fixing bugs</li></ul>                                                                                                                                                                                                                                        |
| 10/2018 - 03/2020 | <b>General Motors</b> Front End Developer <span style="float: right;">Herzliya, Israel</span> <ul style="list-style-type: none"><li>• Worked in a team of front end developers, alongside back end, QA and DevOps, on GSP OnStar — a large-scale (&gt; 2m customers) vehicle communication system</li><li>• Rewrote a major async component from scratch</li><li>• Introduced a new front end architecture built on Redux and RxJS</li><li>• Key duties included developing new features (in ES5, TypeScript and Less), supporting build scripts (in Node.js and Jenkins) and fixing bugs</li><li>• Collaborated with international teams, both internal and external</li><li>• Served as an in-house Git wizard</li></ul> |
| 10/2016 - 08/2018 | <b>Israel Defense Forces</b> Software Developer <span style="float: right;">Israel</span> <ul style="list-style-type: none"><li>• Developed applications using C#, WPF, JavaScript, Node.js, Express, D3.js and Heroku for the IDF's internal use</li><li>• Some examples include data-wiz, Reservists' Database and Guard Duty Scheduler</li><li>• data-wiz discovered trends that informed decisions on prioritizing content</li><li>• It contributed to an increase of 10% in reach and engagement over 3 months</li><li>• Reservists' Database replaced a decade-old web app</li><li>• Guard Duty Scheduler automated a manual and inefficient process</li></ul>                                                       |
| 02 - 07/2015      | <b>BASICALLY</b> Staff Writer and Editor ~ ad hoc Programmer <span style="float: right;">Jerusalem, Israel</span> <ul style="list-style-type: none"><li>• Worked as an intern at a startup</li><li>• Wrote and edited short explanatory financial news stories</li><li>• Composed daily newsletter and uploaded articles to the Android app</li><li>• Wrote two C# console apps that streamlined the process of formatting the articles</li></ul>                                                                                                                                                                                                                                                                          |
| 05/2013 - 05/2014 | <b>AT Consulting</b> Systems Analyst <span style="float: right;">Moscow, Russia</span> <ul style="list-style-type: none"><li>• Worked in a team of analysts and developers on a web CRM application</li><li>• Designed prototypes, wrote documentation, performed user acceptance testing</li><li>• Got a working knowledge of the JIRA bug tracking system</li></ul>                                                                                                                                                                                                                                                                                                                                                      |

## selected projects

personal-website Clojure, JavaScript, HTML, SCSS, CircleCI  
whatsapp-to-html TypeScript, Node.js, Travis CI

<https://danplisetsky.github.io/>  
[npmjs.com/package/whatsapp-to-html](https://npmjs.com/package/whatsapp-to-html)

SVN  
Jasmine  
Jest

- Converts exported WhatsApp chats to nicely formatted HTML

**merge-chapters-md** JavaScript, Node.js, Jasmine, Travis CI

- Merges markdown chapters into a single markdown file

**flick-radar-prototype** JavaScript, Node.js, Express, MongoDB, React.js, Heroku

- A prototype movie-tracker app

**resume-maker** JavaScript, HTML, CSS

- An interactive resume-making tool

[npmjs.com/package/merge-chapters-md](https://npmjs.com/package/merge-chapters-md)

[danplisetsky.github.io/flick-radar](https://danplisetsky.github.io/flick-radar)

[danplisetsky.github.io/resume-maker](https://danplisetsky.github.io/resume-maker)

## languages

proficient

English (IELTS 8.5 / 9)

Russian

familiar

Hebrew

basic

French

## selected contributions

**Cryogen** Clojure, CircleCI

- A static site generator

**iTunesSearch** C#

- An open source wrapper around the popular iTunes REST API

[github.com/danplisetsky/cryogen-core](https://github.com/danplisetsky/cryogen-core)

[github.com/danplisetsky/iTunesSearch](https://github.com/danplisetsky/iTunesSearch)

## education

2008 - 2013 **M.S. Applied Mathematics & Computer Science**

MEPhI, Moscow, Russia

**MOOC Courses**

- C# Course
- Structure and Interpretation of Computer Programs
- Introduction to Functional Programming
- HTML5 and CSS fundamentals

## hobbies

tennis

reading

chess

cooking

philosophy

traveling

## other experience

2015 - Present **Freelance Writer**

- Write feature stories, interviews, columns and more
- Works have been published in Times of Israel, GameSinner and Jewish.ru

[danplisetsky.github.io/publications](https://danplisetsky.github.io/publications)

## extras

**Achievements**

- Was selected to attend summer schools by the Cato Institute (2012) and the Institute for Humane Studies (2014)
- Was selected to attend the Masa Israel Leadership Summit
